Mobile Deposit-Ready Checks

ImageMatch®

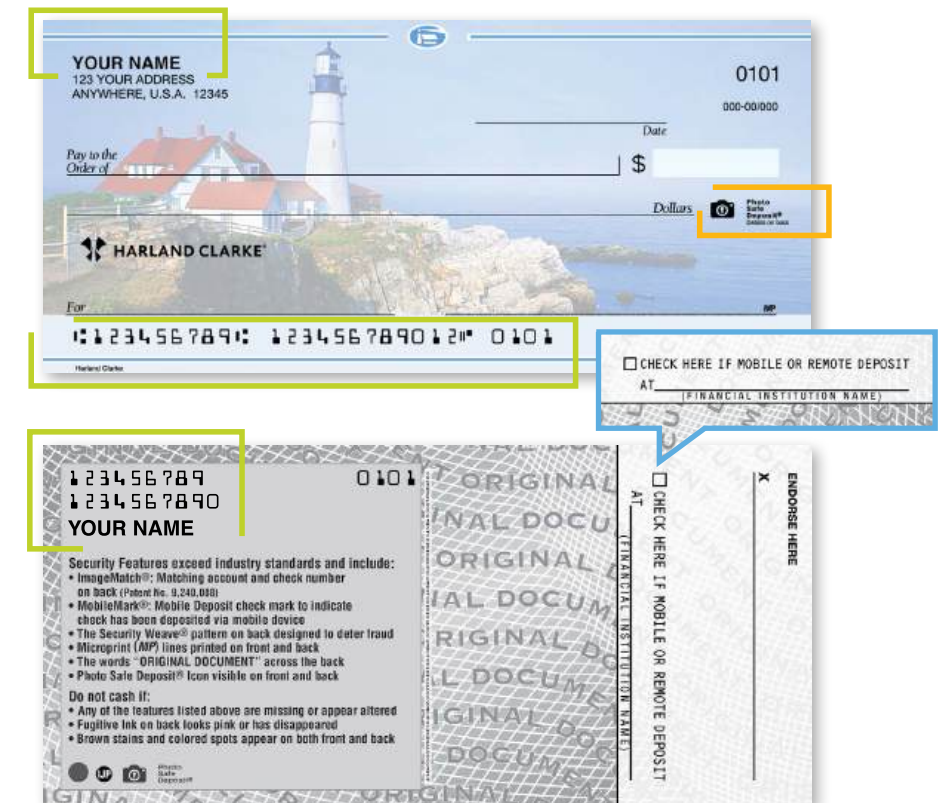

Unique check data matches front and back to help prevent fraud.

Photo Safe Deposit®

Icon indicates the check includes mobile deposit fraud prevention features.

MobileMark®

When endorsing your check, always write the name of your deposit bank or credit union where indicated. After the deposit goes through, be sure to check the box before filing for your records.

ImageMatch, MobileMark and Photo Safe Deposit are registered trademarks of Harland Clarke.

Great Benefits of Buying Checks From Your Financial Institution

- Secure Information — Harland Clarke does not share or sell information to other companies.
- Guaranteed Satisfaction — If we cause an error on your order, we'll replace it at no charge.
- Convenient Reordering — Ask your financial institution representative about ordering options.

Personal Check Security Features — *check backer*

ImageMatch®:
With our patented ImageMatch, the MICR line information and the first line of personalization are printed on both sides of the check, providing visual verification that the back image and front image belong to the same check and creating an additional challenge for fraudsters.

Security Paper:
When common chemicals are used to change the original information on a check, stains appear on this special paper.

Warning Box:
The security Warning Box provides a list of security features present on the check and tells what will happen if altered.

Security Screen:
The words "Original Document" will fade, distort or disappear if a check has been copied or scanned by traditional means.

Security Weave:
This deters counterfeiting, scanning and copying with an intricate patented background design that is difficult to duplicate.

MobileMark®:
When endorsing your check, always write the name of your deposit bank or credit union, where indicated. Be sure to place a checkmark in the box before the deposit goes through and then file for your records.

Photo Safe Deposit®:
Icon indicates the check includes mobile deposit fraud prevention features.

Micro Print:
When magnified, the signature line is actually a line of type that reads "Authorized Signature." A second line on the back reads "Original Document." Microprint will break up and not be readable when copied.

Fugitive Ink:
Chemically altering specific information on a check, such as the name or the dollar amount, may cause extreme discoloration in that area. Washing the check will likely cause the words "Original Document," the Security Weave® pattern and the Warning Box to fade or disappear entirely.

Security Features exceed industry standards and include:

- ImageMatch®: Matching account and check number on back (Patent No. 9,240,088)
- MobileMark®: Mobile Deposit check mark to indicate check has been deposited via mobile device
- The Security Weave® pattern on back designed to deter fraud
- Microprint (MP) lines printed on front and back
- The words "ORIGINAL DOCUMENT" across the back
- Photo Safe Deposit® Icon visible on front and back

Do not cash if:

- Any of the features listed above are missing or appear altered
- Fugitive Ink on back looks pink or has disappeared
- Brown stains and colored spots appear on both front and back

Authentication Tips

Read the instructions in the warning box to better understand what security features to review. Review both sides of the check and inspect any handwritten information to ensure it does not appear erased or altered in any way. Look on the back and verify the presence of endorsement line, micro print, words "Original Document," and Security Weave pattern.

Prices and products are subject to change without notice.
